

Soccer Goal SAFETY ANCHOR

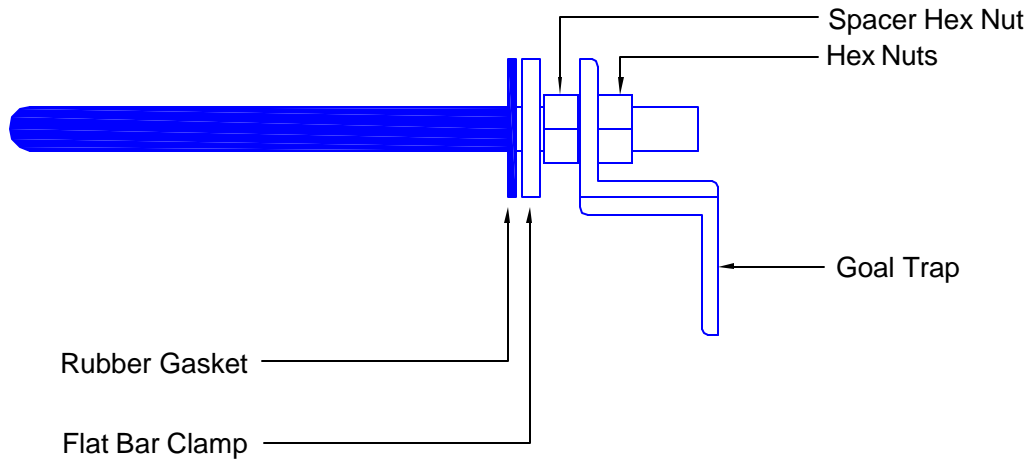

Center the soccer goal's back stay bar against the football goal's gooseneck. Then place the u-bolt around the gooseneck and fit the goal trap bracket as shown. Make sure that the bracket and u-bolt assembly are closest to the ground as possible. Then tighten the bracket so the backstay is securely snug between the football goal's gooseneck and the ground.

NOTE: If back stay bar is wider than 2" the spacer nut may need to be used to tighten the clamp bar and the other hex nut used to tighten the goal trap bracket.

NOTE: If back stay bar is wider than 2" the spacer nut may need to be used to tighten the clamp bar and the other hex nut used to tighten the goal trap bracket. (Otherwise do not use the spacer hex nut.)
