

# Tuffy® WINDSCREEN

100%  
MADE IN  
USA

**WORLD'S TOUGHEST TENNIS WINDSCREEN**

Made exclusively of  
VIPOL® Matrix Material

This super tough fabric outperforms conventional windscreens because 50% more micro-fibers are woven into it. It's more sun resistant, virtually tear-proof, and the most puncture resistant of all windscreens. *Tuffy Windscreen features LOCK STITCHED sides and corners to assure that they do not unravel like conventional chain-stitched windscreens. So tough and durable, it's backed by a 4 YEAR Limited Factory Warranty.*

ITS PROFESSIONAL APPEARANCE ENHANCES ANY FACILITY.

"When I started in the tennis industry twenty years ago, court maintenance was a part of my job, and the Pro that oversaw me was a stickler for well-kept courts. He instilled in me that a member's first impression of your club was influenced by the appearance of your courts' windscreens. The importance of this was driven home with repeated re-hangings after my installation wasn't straight enough or sagged a little. Many years and several clubs later, I still pay close attention to the windscreens I use. When it came time to order windscreens for our outdoor courts this past year, I convinced my manager to switch to the Tuffy brand. The nine-foot custom imprint Tuffy windscreens that we ordered have been outstanding in every way. They are well-built, with attention to detail, and the club logo imprints have been the talk of our membership since we put them up—our people love the look and the "pop" that the logos provide. Our staff loves the professional look that it gives our club, not to mention the great first impression people get when they come by. So, a huge thank you for helping our club look and be its best."

Hunter Lipscomb, USPTA, Tennis Director  
Timberhill Tennis Club, Corvallis, Oregon

Tuffy Windscreen is available in 17 colors:

Midnight Green, Black, Navy, Royal Blue, Green, Red, Maroon, Orange, Gold, Beige, Vegas Gold, Brown, Purple, CC Sky Blue, Burnt Orange, Grey, White

**Chroma-Bond® IMPRINTING** Our exclusive process for vivid logo imprints that are much more durable than competitive spray-on or digital imprinting. (See other side for more details.)

Official tennis windscreen  
of USPTA

"Our courts now have a more professional look after we installed the new Tuffy Windscreen. Our logo imprint is so impressive that we regularly get positive comments from players and spectators."

Bryan Richard, Operations Manager  
Family Circle Tennis Center, Charleston, SC

Industry's Quickest Delivery.

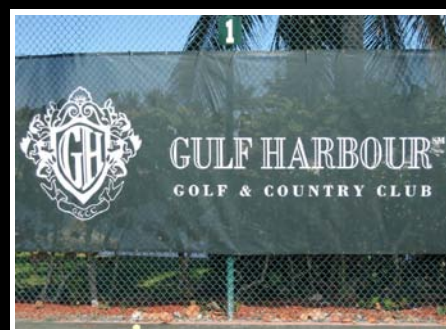

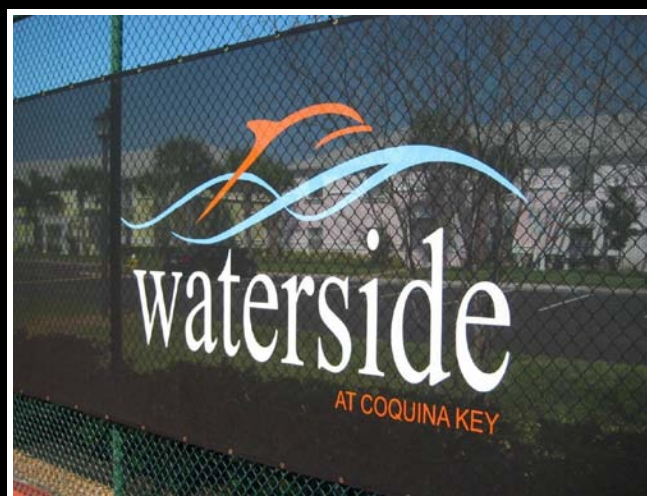

# Chroma-Bond® IMPRINTING

**Chroma-Bond® Imprinting** solves the problems of hand stenciled, sprayed-on, or digital printing (weathering, jagged edges, flaking paint, white backside color, limited color choices, etc.). Skilled craftspeople use our proprietary graphics technology to produce sharp images in single or multi-colors. Imprints are much more scuff, sunlight, and weather resistant than digital imaging, and can reproduce detailed logos in **sizes up to 8' tall** (or even taller if desired) with great accuracy. Quality imprinting on Tuffly® Windscreen gives a professional appearance to any facility.

Can match exact PMS colors.
