

## Inventor of the World's First **ROTATING FOOTBALL GOALS**

Patent Pending

SportsEdge®, the leading manufacturer of innovative sports construction products, is the first to introduce *ROTATING FOOTBALL GOALS* that help solve the problems associated with multi-use soccer and football fields.

This revolutionary Goal Post can easily be rotated 180 degrees facing away from the field of play during soccer games, and rotated back for football games. *Operation is extremely simple*; it takes less than a minute to rotate the goals completely, and can be done by any one person. Only 25 pounds of pressure rotates the goal with the use of the included four foot rotation handle. The goal post locks securely in place in either position. Two pad locks per goal provide tamper-proof security and safety.

With creative minds, superior engineering and the highest quality manufacturing, SportsEdge® is proud to produce what is simply *the best football goals ever made*. Manufactured in our facility in North Carolina, the SportsEdge® ROTATING FOOTBALL GOALS are the perfect solution for multi-use fields.

### PROBLEM SOLVED!

When a soccer goal is put underneath a football goal gooseneck, the soccer goal crossbar is only 16 inches below the football goal crossbar. This causes a problem for officials during soccer play because the ball can rebound off either the soccer goal crossbar (in play) or off the football goal post (out of play), and the officials can not always distinguish between the two. The crossbars' being so close together has also been an issue with corner kicks because of the ball hitting either the football goal upright or the end of the football goal crossbar. The only remedy to date had been to pull the soccer goal forward two yards on each end of the field, however, this reduces the length of the soccer field by twelve feet and requires an additional game line in the middle of the football end zone. Installing SportsEdge Rotating Football Goals solves all the problems associated with these multi-use fields!

**SPORTSEGE® SOLUTIONS:**

- The SportsEdge® Rotating Football Goal Post can easily be rotated 180 degrees facing away from the field of play during soccer games.
- Operation is extremely simple; takes very little effort and *less than 60 seconds!*
- Securely locked in place in either position with two pad locks per goal.

**Standard Rotating Goal Set Includes:**

- 8' Offset Goosenecks
- Yellow Powder Coating
- Adjustable Ground Sleeves
- Padlocks (4) Keyed Alike
- Rotation Handle, 48" Length
- Hardware Kit
- Wind Directional Flags
- Touch-up Paint

MODEL #	DESCRIPTION	GOOSENECK	UPRIGHTS
