

# SE362 - HAMMER CONVERSION CIRCLE

## SPECIFICATIONS

The SE362 Hammer Conversion Circle is designed to be installed in an existing discus circle to convert it for the hammer throw. This allows single circle hammer cages to be used for both hammer and discus competition. The circle is molded out of a stiff but pliable PVC plastic. Dropped hammers will not bounce off of or damage it. The circle consists of four interlocking sections that form a solid, rattle free ring which is easily installed and removed. This circle is compliant with NCAA specifications for conversion circles. Dimensions in brackets are in centimeters.
