Optional: Blank lid - 1/8" metal sheet with user's track surface installed. Useful for field house applications.

Lid track surface - Installed by user to match surrounding surface.

Cover - 1/8" HMPE molded sheet. Holds lid track surface in place.

Skydex material eliminates the need for a box collar.

Tray with support structure - molded fiberglass with steel supports. Improved stability for easier installation.

A ½" drain hole may be drilled in the bottom center section of the fiberglass tray. It can be connected by a tube to the site drainage system.

A ½" drain hole may be drilled in the bottom center section of the fiberglass tray. Sand/stone/gravel should be piled up around this area so the tray can drain into the ground.
