

# CHAMPIONWALL

## PRODUCT LIMITATIONS

ChampionWall® provides an alternative solution to fence/wall systems constructed with wood planks, chain-link, metal panels or masonry with padding. ChampionWall is co-extruded with XCR Technology™ creating a durable interlocking panel wall as part of an engineered fence system that will not rust, rot, or tear. However, like any other fence/wall material, ChampionWall is not indestructible. The following performance and use limitations should be considered when specifying ChampionWall for your sports field application.

### Performance & Use Limitations

The product is not designed or intended to be used:

- As a backstop for pitching practice
- With expected high velocity impacts not typical to regular play
- When ambient temperatures are below 40°F

Additionally, ChampionWall is not designed to withstand impacts from rocks, golf balls, lacrosse balls, and track and field equipment: shotput, discus, javelin, etc. This will create cracks or penetrations and constitutes misuse.

The field side color finish has a high performance, UV resistant cap-stock. However, like all materials exposed to sunlight, some color change is possible over the life of the application.

ChampionWall comes with a five-year warranty against manufacturing defects. Product specifications available upon request.
