Synthetic  
Turf Anchor

**ABT, INC.**

## SportsEdge Synthetic Turf Anchor

**SportsEdge<sup>®</sup> Turf Anchor across the D Zone**

As the synthetic turf industry continues to grow and evolve, addressing the interface between the playing field and various other surfaces has become a fundamental concern.

The **SportsEdge Turf Anchor** is manufactured specifically for anchoring either synthetic infill turf systems or traditional 1/2" - 3/4" knitted nylon turf systems. The SportsEdge Turf Anchor eliminates the problems associated with a traditional concrete curb and a wood nailer, as well as the various other methods that fail to address the safety concerns of designers and owners. This innovative product improves athletes' safety and overall aesthetics for any synthetic turf project.

## SportsEdge Turf Anchor Advantages:

- **SAFETY:** 3/4" Resilient Rubber is Exposed in the Finished Edge.
  - a. Exposed Concrete and Hard Surfaces are Minimized / Eliminated.
  - b. Virtually No Elevation Changes or Trip Hazards; Smooth Transition between Various Surfaces.
- A Wood Nailer Below Grade is Eliminated.
- Infill Material is Contained with the Built-In 1 1/2" Offset.
- **AESTHETICS:** SportsEdge Turf Anchor Provides the Cleanest Possible Finished Edge Detail.
